## Invenergy

# SunDog Solar Energy Center

The SunDog Solar Energy Center is a proposed 200 megawatt (MW) solar power generation facility in Pinal County, Arizona targeted to begin operating in 2026. Solar technology uses the power of the sun to deliver clean, reliable energy and is one of the lowest-cost energy sources available.

#### **Invested in Your Community**

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

### **Project Timeline**

2018–2024

Development
Activities include permitt

Activities include permitting, environmental studies, interconnection studies, etc.

Construction

2026

Operation

More than **\$209 million** invested in local tax revenue, land costs, and lease payments over the life of the project

**200 MW** is enough electricity to power more than **57,000 American homes** 

Up to **400 jobs** supported during construction

Up to **5 full-time** operations and maintenance staff

Emissions reductions equivalent to **156** million trees planted

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's 100<sup>th</sup> project, Southern Oak Solar Energy Center, located in Mitchell County, Georgia.

#### A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed over 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
