

Yuma Solar Energy Center

The Yuma Solar Energy Center is a proposed 70 megawatt (MW) solar power and 70 MW energy storage facility in Yuma County, Arizona, targeted to begin operating in 2024. Solar technology uses the power of the sun to deliver clean, reliable energy and is one of the lowest-cost energy sources available.

Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

Project Timeline

Project Highlights

More than **\$30 million** invested in local tax revenue, land costs, and lease payments, over the life of the project

70 MW of solar power is enough electricity to power more than **19,000 American homes**

Up to **250 jobs** supported during construction

Approx **7 full-time** operations and maintenance staff

Emissions reductions equivalent to **51 million trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy developed project, Luning Solar Energy Center, located in Mineral County, Nevada.

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
